

Planting Diary 2

By Jack

2018.11—Relaxing time

This weekend, it's time to plant my home with plants for relaxing again.....

Several weeks ago, I've made the thick growth of mints and basil of GrowWall to be as a nursery garden for providing some nursery to plant my gym of my house. And I found the mints and basil grow very well, therefore, an idea came into my head suddenly; why not make several same design O2-Lights with mints as an herb fall in front side and basil as a basil wall in back side?

Meeting Room

I set an O2-Light with mints as an herb fall in front side and basil as a basil wall in back side in my meeting room. When I work too hard to concentrated, I can do some exercise and look my plants. My meeting room has a good Feng Shui and my eyes may be rest, killing two birds with one stone.

Entrance Hall

The entrance hall should be created a warm place which welcomes your families to come home or customer to your house. I set an O2-Light to my

entrance hall with lights and plants; I think it's so warm and happiness when my families go home to see lights and plants to welcome you going home!!!

Studying Room

Although, I'm not really a good gardener, but I really like to plant my house with products of OPCOM Farm which planted many types of plants I do myself. With the products of OPCOM Farm, I can plant many types of plants not only without dirtying my hands but also without under the sun, even without plant with bugs and mosquitos.

I also teach my younger daughter Vivian to set another O2-Light in her desk. When the lights of the O2-Light provided its light source to the plants planted therein, the plants make photosynthesis to provide fresh air to the studying room. The fresh air from the plants planted in the O2-Light may increase oxygen and make good mind. If Vivian gets great achievements, my and OPCOM Farm's contributions cannot go unnoticed.

After tea time, start planting time !!!!

This team time, I make cups of majito with some mints, sprit Lemond and diluted wine for sharing my wife, cheers!!!!

After tea time, I find we need more and more fresh vegetables to health my life, therefore, I go to my grow stack to enjoy my planting fun!!!!
