By Jack

## Feng Shui Planting

Last weekend, the growth of O2-Light as a Feng Shui Planting disposed in my gym is very luxuriant, therefore, I can make much perfect cup of mint tea.

In my study room, I found that some Cypsophila I brought from flower market planted into O2-Light make O2-Light look like beauty and luxuriance.

### **Mint planted easily and has many advantages !!!**

I found that mints grow and become longer, if you want to plant mint, you can cut one or two leaves and graft them into O2-Light, the growth of mint is

very fast without mint seeds, and you have much mint to make more and more tea.

**OPCOM Farm Products can plant all types of plants!**

You only buy a pot of mint and graft leaves into one of OPCOM Farm products such as GrowWall, GrowBox, GrowFrame and O2-Light, you may have green to enjoy and enough fresh mints to make tea. Do you want to try??? Buy products to plant from OPCOM Farm [www.opcomfarm.com](http://www.opcomfarm.com)
