

OPCOM® is Showcasing world's first Fully automatic Hydroponic growing system with the Innovations for connected home, Smart and Healthy Lifestyles at the InfoComm17.

Booth:#2793 at the Orange County Convention Center, June 15-18, 2017.

InfoComm 2017 - **OPCOM**®Link USA will be showcasing US households new products. Promoting smart and healthy lifestyles that utilize **OPCOM**'s innovations in hydroponic indoor gardening system.

Products include:

- **OPCOM**®Farm's GrowBox2 and GrowWall2 advanced indoor gardening systems provides easy gardening from individual to commercial scale without the limitations of outdoor weather, insects and diseases. Make your grow uninterrupted all year round.
- **OPCOM**®Farm's GrowTank provides perfect solutions for those in favor of larger plants such as tomato, cucumber, melon and other recreational plants. Thanks to our dedicated product development team, we created the multi grow system, which offers you to expand and link all your **OPCOM**®Farm products together.
- GrowFrame, a compact and decorative product for indoor gardening.

- Optional Kits include: camera creating time-lapse videos and real-time streaming via mobile app. You can monitor your plants from seed to harvest wherever you are. In addition, our patented LED grow lights output Sun-simulation full color spectrum to fulfill various plants with different lighting requirements.
